

## 1. Click File, choose Project Structure

## 2.add the war of project and set the path

## 3.Build War

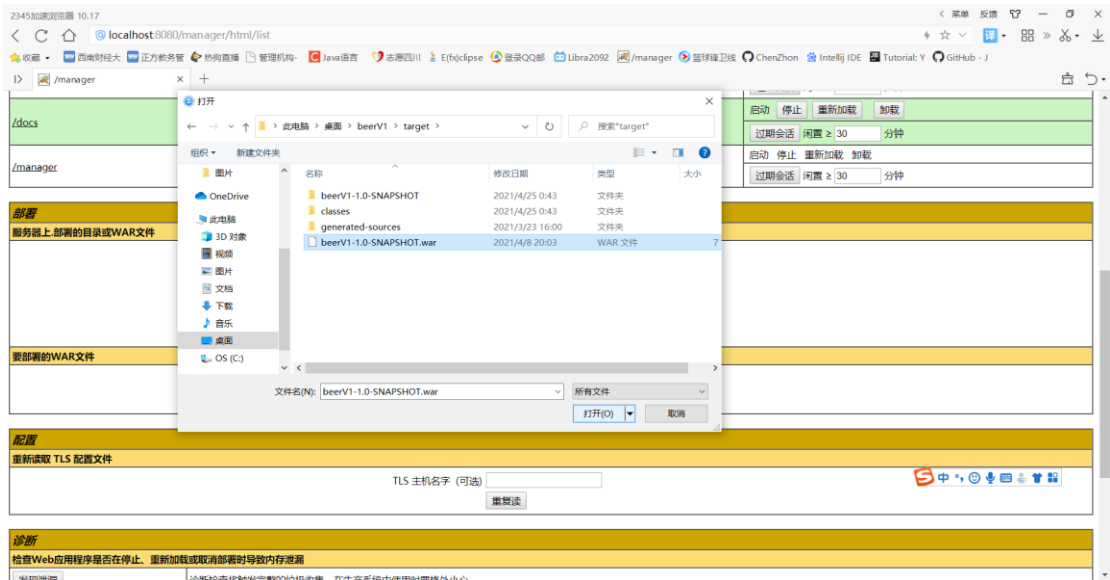

Then the war will be built in directory we set in the second step

## 2. Deploying the WAR file

First, open Tomcat by host:8080

Then click “选择文件”, then select the war in directory, then click “部署”

After that , we have done the deploying of war.
